ACQUISITION THESIS

The commercial layer is early. The product infrastructure is already built.

The buyer acquires product, technology, Netherlands-specific operating infrastructure and transfer readiness - then applies its own distribution and commercial model.

From fragmented tasks to a clear route.

Moving to the Netherlands creates connected but fragmented journeys across public services and everyday life.

I need BSN*

ts, national guidance and local relevance all influence the order.

LANDS

gID and residence documents

es municipal registration and BSN, DigiD, address changes and IND residence documents.

1 | INTENT SEARCH

A task query finds the relevant route.

How this page is structured

The page gives a structured view to accessible resources. It does not cover local providers, eligibility, prices or fees. Check the exact official source before acting.

What this covers

BSN, BPP registration, DigiD and residence documents are related but different. Municipalities handle local registration routes, DigiD is the government login service, and IND handles residence applications and documents.

Who this is for

Use this tool when you need a BSN, need to register or change an address, need DigiD, or need the correct IND residence document route.

Location

Municipal registration and appointments are local. The national exploration and official residence services remain available for every selected city.

What to do

1

Choose the exact task: BSN, municipality registration, DigiD, address change or an IND residence matter.

2

For registration, open the official municipality page for the address and check its current appointment and document list.

3

Use the official DigiD site for application, activation and recovery.

4

Use IND for residence permit and residence document procedures.

5

Do not send identity documents through an unofficial form or contact route.

Documents and evidence

The required documents depend on the task and personal situation. Use the official municipality, DigiD or IND checklist for the exact application.

2 | GUIDED CONTEXT

This route distinguishes BSN, DigiD and residence documents.

Citizen service number (BSN)

English

A citizen service number (BSN) is the personal number y
use in your dealings with the Dutch authorities. Even if
live abroad or do not hold Dutch nationality, it is still po
to have a BSN.

3 | OFFICIAL HANDOFF

The responsible source completes the journey.

Product principle

YouNew helps the user understand the next practical step, then hands off to the responsible official source.

TRANSFER PREPARATION

Clean-build, QA, deployment, backup/restore and technical handover evidence is prepared for controlled diligence.

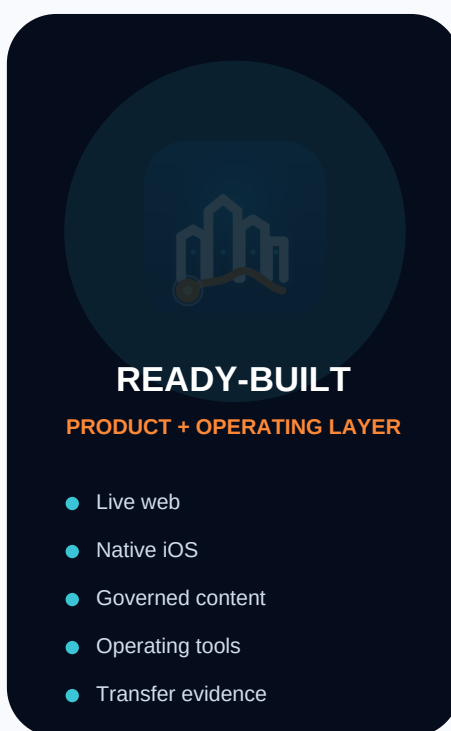

Start from a working product, not a blank roadmap.

YouNew gives a strategic buyer an existing Netherlands product layer that can be integrated, extended or commercialized through the buyer's own channels.

BUYER APPLIES

WHAT THE ACQUISITION CHANGES

No exact cost or time saving is claimed. Strategic benefit depends on buyer scope, integration and execution.

Acquire the operating layer. Build the commercial engine.

YouNew is commercially early but technically developed. The opportunity is to acquire the completed product and operating infrastructure - not current cash flow.

PRE-REVENUE

EARLY COMMERCIAL LAYER

No revenue, paying-customer or proven-market-fit claim is made.

COMMERCIALIZATION PATHS

POTENTIAL - NOT VERIFIED REVENUE

A strategic buyer can apply its own distribution, customers, capital, partnerships and commercial model to the existing product.

● Relocation / mobility

● Employee onboarding

● Newcomer services

● Housing journeys

● Verified business profiles

● Sponsored placements

● Referral / affiliate models

● B2B or municipal licensing

TRANSACTION SCOPE

The entire YouNew product ecosystem is available for acquisition, subject to final transaction schedules and rights verification.
